

Dataviz with R: 3 steps to get ready!

STEP 1: Download R & Rstudio

Windows users:

- Download R from the following link: <http://cran.r-project.org/bin/windows/base/> (Download R 3.1.0 for Windows)
- Download Rstudio from the following link: <https://www.rstudio.com/ide/download/desktop> (RStudio 0.98.501 - Windows XP/Vista/7/8)

Mac users:

- Download R from the following link: http://watson.nci.nih.gov/cran_mirror/ (R-3.1.0-snowleopard.pkg)
- Download Rstudio from the following link: <https://www.rstudio.com/ide/download/desktop> (RStudio 0.98.501 - Mac OS X 10.6+ (64-bit))

STEP 2: Install R & Rstudio

Just double-click the downloaded files and follow the instructions.

STEP 3: Install a few packages

1) Open Rstudio

2) Enter the following command line in the Rstudio console (bottom left window):

```
install.packages(c("ggplot2", "scales", "maps", "ggthemes"))
```

- click enter

You're all set!!
